SUMMARY

As a seasoned Frontend Developer with over 5 years of experience, I specialize in crafting modern, user-friendly, and scalable web applications. Proficient in a range of technologies including Vue.js (2,3), Nuxt 3, React, Next, TypeScript, and UI frameworks like Element UI, Vuetify, PrimeVue, and Quasar, I excel at integrating tools such as Bootstrap, Tailwind CSS, Redux, Pinia, and Vuex to enhance performance and maintainability. With expertise in implementing internationalization solutions using libraries like vue-i18n, I ensure seamless multilingual support for global users. Proven in modernizing legacy systems and leveraging technologies like server-side rendering (SSR) and static site generation (SSG) for high-performance applications, I am passionate about staying at the forefront of industry trends, mentoring junior developers, and driving technical excellence. I thrive in cross-border collaborations, having contributed to projects across Myanmar, Singapore, and Malaysia.

WORK EXPERIENCE

Senior Front-end Developer

Apr 2023 - Feb 2025

City Developments Limited (Singapore)

- Project Development and Maintenance: Developed and maintained projects using Vue 3, Nuxt3, and TypeScript.
- Security Integration: Integrated OKTA authentication for secure user access.
- UI Component Design: Designed reusable UI components using Element Plus, Prime Vue, VueUse, Tailwind CSS, and Quasar framework.
- Performance Optimization: Implemented Server-Side Rendering (SSR) in Nuxt.js.
- Project Management: Created and implemented project requirements, ensuring smooth development processes.
- Technology Leadership: Led transitions to modern technologies, enhancing performance.
- International Collaboration: Collaborated with international teams for smooth coordination.
- UI Design: Designed intuitive UI to align with project goals.
- Documentation: Maintained detailed documentation of front-end tasks.
- Feature Development: Added new features to applications from a user-centered design approach.
- Code Reviews: Conducted code reviews for functionality and accuracy.
- Team Mentoring: Mentored junior developers on best practices.
- Risk Assessment: Assessed and managed project risks.
- Stakeholder Communication: Communicated project updates to stakeholders.
- Technical Specifications: Composed technical specifications for projects.
